

## Features

- 1U high
- Front panel ready for silk screening
- Rear and side panels in extruded aluminium
- Top cover easily detachable
- Inside grooves for PC-boards and tapped strips
- Three different depths available as standard
- Top and bottom cover panels in black "leather look"
- Suitable for communication equipment

Micro 19 series is ready for rack mounting. The front panel is 3 mm thick and completely flat for easy machining and silk screening. Micro 19 series has been developed for micro-computers, modems, communications and computer peripheral equipment. Grooves in the side extrusions make mounting of PC-cards and cover plate a simple slide-in operation. Micro 19 series enclosures are available in 3 standard sizes and delivered complete and ready for assembly.
